PyCity School Analysis

Of the 15 schools, there are a total of 39170 students, where the average score in mathematics was 78.98 and in reading was 81.87, giving us an idea from the results that there is still a major area of opportunity in mathematics where there should be a greater focus to increase knowledge.

In terms of the percentage of mathematics that could have a score equal to or higher than 70, it was 75.98%, which represents 29,761 students who had the basic skills to pass the exam.

For reading it was 85.80%, representing 33,607 students who had the basic skills to pass the exam.

Analyzing the above percentages for each subject we can see that only a total of 65.17% passed both exams, knowing that the school with the best results for both exams was PENA HIGH SCHOOL. The average of the top-ranked schools under the heading of a score greater than or equal to 70 was Bailey High School.
